STATINTL

Attention: [redacted]

Subject: Design Approval

Enclosure: (1) File Structure of TTY and DATA Messages

Sir:

Enclosure (1) is being submitted in response to an action item identified during the Design Review which was conducted at this facility on 20 Dec. 1977. I am confident that the information provided in enclosure (1) satisfies the software security requirements of the contract.

We have changed our approach from that which was presented at the review. This new approach requires the use of two additional Data Control Blocks but reduces the number of instructions required to perform the task.

It is my understanding that your approval of this approach will conclude the design review and that Phase II of the program will be initiated.

Should you need more information or amplification of our approach please contact me as soon as possible.

Sincerely,

Joseph L. DeChristopher

Joseph L. DeChristopher
